Specifications

1. **Suspension Size:** For optimum performance, testing recommends luminaire total OAL (overall length) in proportion to the Body diameter. For close-to-ceiling mounting, it is suggested to use shorter single stems as noted on Spec Sheet SB115. Total luminaire OAL is defined from the bottom of the diffuser to ceiling plane.
   Note: 3 Cable suspension cannot be used with Cirrus Pendalux Series.
2. **Stem Wires:** Equipped with 120" of leads with keyed connectors for quick connection to Body wiring.
3. **Suspension:** Swivel (central) stem, 5/8" steel tube. Die-Cast Ball hanger attached.
4. **Cables:** Reflector Bowl is suspended from a central pointon three 1/16" stainless steel cables.
5. **Mounting Strap (Cross Bar):** Die-formed galvanized steel.
6. **Canopy:** Steel, 7" diameter, fastened internally, no exposed hardware. Ball hanger on stem that fits into cross bar allows installation on ceilings with slope up to 45 degrees. Complies with California Earthquake Code.
7. **Cutting Jig**: All suspensions are equipped with a Patent Pending cutting jig that simplifies cutting of center stem pipe in the field.
